

Dick's experience as a landscape architect includes all phases of landscape design, construction documentation and construction management. Projects in both the public and private sectors include single family estates and multi-family residential, commercial, institutional, sports and recreation site developments, large scale master planning, and destination resort site planning. Dick has been directly responsible for design projects in over 30 states gaining an understanding of a wide variety of construction techniques and plant materials.

As a managing partner, Dick's responsibilities have included project management, management of design personnel, marketing, proposal writing, and office management.
